

# Mail-order Incentive Program

Keep your prescription drug costs down with mail order

**Do you want to save money on your prescription costs? Your plan offers you an incentive for buying your long-term medicines (those you take for three months or more) through mail order, helping you keep more money in your own pocket.**

## Mail-order Incentives

Long-term medicines are those taken for three months or more. They are often used to treat conditions like high blood pressure, high cholesterol or diabetes. Long-term medicines can be ordered from our mail-order service partner, Express Scripts, and will be delivered directly to your home or other requested location.

Your plan's mail-order incentive includes one copay for mail-order purchases (up to a 90-day supply for each prescription) and another copay for retail pharmacy purchases (up to a 30-day supply for each prescription). You can purchase your long-term medicines at a participating retail pharmacy for the initial 30-day fill, plus a certain number of refills (up to a 30-day supply each fill) before you will pay a higher copay at the retail pharmacy.

## Example

	First three fills (up to a 30-day supply) at network retail pharmacy	Fourth or more fill (up to a 30-day supply) at network retail pharmacy	Each fill (up to a 90-day supply) at Express Scripts Home Delivery Pharmacy
Generic	\$10	\$20	\$30
Preferred brand-name (formulary)	\$20	\$40	\$60
Non-preferred brand-name (non-formulary)	\$40	\$80	\$120

**Note:** Your days' supply limit and copays may vary based on your plan.

In this example, if you fill a prescription for a preferred brand-name (formulary) drug at a retail pharmacy for three months, then through mail order for the rest of the year, you will pay:

Retail copay (\$20 x three fills\*) .....\$60  
 Mail-order copay (\$60 x three fills\*\*) ..... \$180  
**12 month total ..... \$240**

\* 30-day supply

\*\* 90-day supply

If you fill the same prescription at a retail pharmacy each month for the entire year, you will pay:

Retail copay (\$20 x first three fills\*) .....\$60  
 Retail copay 4th fill and after (\$40 x nine fills\*) ..... \$360  
**12 month total ..... \$420**

By using mail order, you save \$180 in your pocket during the first year on your medicine. Plus it is delivered conveniently to your home (or other requested location) for no additional charge.
